BIOFACH

NÜRNBERG

**13-16. 02.
2024**

STAND: 4A-411

Dear Reader,

Hungarians are well-known for being a passionate people. They are quick to act, and take a stand for their creativity, opinions and faith.

Our unique outlook on life and our vigour is apparent in our every thought, and these qualities also permeate our culinary culture.

No wonder, then that since ancient times we have loved distinctive, pronounced flavours, hot spices and substantial, traditional dishes.

Our agriculture, our GMO-free status – which is guaranteed by the constitution – and the uniqueness of our cuisine is world-famous.

With our expertise and several decades of experience, our mission at AMC is to raise awareness about, to encourage the enjoyment of, and to propagate healthy, tasty, high-quality Hungarian products that are manufactured using eco-conscious processes and are made with respect for the methods our ancestors bequeathed upon us, by passing on our knowledge from one generation to the next, and by encouraging new and innovative technologies.

As a result of our unequalled geographical and natural endowments, our eminence in producing food products, and thanks to our high level of food safety compared to other EU members we are able to offer food products with high added value.

Visit our booth, explore the high quality Hungarian products of our exhibitors and taste the delightful flavours of our dishes and drinks so you can choose the ones you think are worth sharing with your loved ones.

Péter Ondré

HUNGARY

Discover the BIO products of Hungary

In Hungary, agriculture and food economy have traditionally been among the most important sectors. The Hungarian agriculture has a **diverse production structure** due to its excellent natural endowments. Nearly two-thirds of the country's area are under agricultural cultivation, making it the fourth biggest per capita agricultural area in the EU. Within production, the most important role is carried by cereals, oilseeds, vegetables and fruits, poultry, pork and beef cattle as well as milk production.

Hungary has great potentials for **organic farming**.

In addition to cereals, flours, vegetables and fruits, which account for a **large volume of Hungarian exports**, we also offer food specialties to our foreign partners such as gourmet tea specialties, spices, mushroom products, dried fruits, cold-pressed oils and valuable herbs. Some of these product lines will also be presented at this year's BIOFACH & VIVANESS exhibition. In the case of additional needs, Agrármarketing Centrum, which coordinates the Hungarian community presence, can also provide the interested partners with the contact details of other Hungarian producers and food processors.

3 REASONS TO CHOOSE THE HUNGARIAN BIO PRODUCTS

The Hungarian agriculture has a diverse production structure due to its excellent natural endowments.

The Hungarian veterinary and food safety regulations are among the strictest in the European Union.

The Hungarian Government's policy of promoting organic farming and the support system developed within this framework also played an important role in this.

Our story started in 1997 as a small business inspired by the healthy lifestyle. Today, we are one of Hungary's market-leading manufacturer of organic food. Our main plant is gluten-free and is IFS certified. We are offering Biopont branded organic food products and we are also offering customized private label products: extruded snacks, pretzel sticks, sweeteners, coconut slices, flours.

BOTESZ (Sales Cooperative of Elderberry Producers) has an experience of almost 25 years in the production of high-quality elderberry and sour cherry. The main activity is to organize the sales of elderberry (3,500 tons) and sour cherry (1,000 tons), grown by its members. Therefore, we would really appreciate to have a meeting with you in order to present our products and discuss how we could bring value to you and your customers.

In the beginning, during the establishment of an organic farm, our family farm started to deal with organic chicken meat and organic eggs as a small producer. Since there were no professional organic feed plants in Eastern Europe, I started to produce our own recipes developed on the basis of experience as a business. As a result of the interest, we started production in pellet form as Éden Major Biotakarmány Kft. We are currently developing our products based on the experience of our own flocks, which are organic poultry starter, breeder, finisher, as well as organic dairy cow, ruminant pig and pig feeds. In our feeds, we use RoBioMix Öko premixes developed together with DSM Nutrition. We are also distributors of the DSM RoBiomix eco premix product line.

Products: cold-pressed seed oils, gluten-free seed flours, gourmet seed butters/spreads

Our company produces premium quality cold-pressed oils from 18 kinds of seeds, and their by-products: gluten free seed flours. Thanks to our unique production chain and machines – which were developed by us – we maintain an environment-friendly zero-waste technology system. We hold an organic certification for a wide range of our products, and most of the seed flours produced by our company are certified gluten-free. Our company is also FSSC certified.

Products:

Our company is located in Szeged, in the domestic centre of spice paprika production. This is where we make our products in line with traditional methods but using modern equipment. We lay great emphasis on food safety and quality assurance.

Our main products are:

- Spice paprika powder (sweet/hot, smoked, organic)
- Spice paprika grits (sweet/hot, organic)
- Spice paprika seed oil (sweet/hot, organic).

Our products are available from 50 g to 25 kg packages.

Our company was founded primarily for the production of “apples of szatmár”. We offer our apples fresh, and also used to produce dried apple chips, dices and apple flour in organic and conventional quality. Our aim is to produce quality products without additives, in the spirit of naturalness. We also produce freshly pressed apple juice from the apples, and traditionally made plum and apple jams.

It's just natural!

Online, real-time food catalogue and event management software

– Find your Hungarian export partner easily –

As part of the 2021 business development activity of Agricultural Marketing Centre, we intended to create a real-time, online interface with up-to-date data, which categorizes Hungarian food manufacturers and their products, thus making them transparent and easily accessible for those interested in importing. The system has been developed to become a modern, easy-to-use platform in line with today's IT trends, which provides professional help equally for the Hungarian Food Industry players as well as for foreign buyers.

ABOUT THE SOFTWARE

- Online, real-time database
- Contains the profiles of the exporting Hungarian food manufacturers
- Segmented product portfolio that can be filtered according to several aspects
- Two-stage registration
- Once registered, the software is worldwide available with English language user interface
- Direct internal mailing system

WHAT WE OFFER

- An online, business facilitator food industry software
- Free registration / usage
- Knowledge base for exporting, professional reports
- Simplified registration and matchmaking possibility for events organized by the Agricultural Marketing Centre
- Quick download of the country catalogue in pdf format
- Online, printable database of exportable Hungarian food manufacturing companies and their products
- Most relevant export and delivery data

Register your company and products at www.hungarianfoodexport.com
